Notes to Consolidated Financial Statements

(Expressed in Canadian Dollars)

(Unaudited)

Six months ended January 31, 2010 and 2009

1. Basis of presentation

Zecotek Photonics Inc. (the “Company”) is a public company which was incorporated on November 25, 1983 under the laws of the Province of British Columbia, Canada. The Company changed its name from Zecotek Medical Systems Inc. on November 26, 2007.

These interim financial statements have been prepared in accordance with generally accepted accounting principles on a going concern basis, which presumes that the Company will be able to realize assets and discharge liabilities in the normal course of business for the foreseeable future. The Company has incurred significant losses since its inception. These factors, among others, raise uncertainty about the ability of the Company to continue as a going concern. The continued operations of the Company are dependent upon the ability of the Company to obtain further equity financing, the support of its principal shareholders and achieving profitable operations sufficient to meet all obligations, the outcome of which cannot be predicted at this time.

These financial statements do not give effect to adjustments, if any that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities in other than the normal course of business and at amounts which may differ from those shown in the financial statements.

Certain information and disclosure normally required to be included in notes to annual consolidated financial statements have been condensed or omitted. These interim consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended July 31, 2009. The consolidated interim financial statements have been prepared following the same accounting policies and methods of computation as the audited consolidated financial statements for the year ended July 31, 2009.

Certain comparative figures have been reclassified to conform to the current period’s presentation.

2. Adoption of new accounting standards

Goodwill and intangible assets

Effective August 1, 2009, the Company adopted CICA Handbook section 3064, Goodwill and Intangible Assets, which replaces Section 3062, Goodwill and Other Intangible Assets, and Section 3450, Research and Development Costs. This new section establishes amended standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented companies. The adoption of this standard did not have a material impact on the financial statements of the Company.

3. New accounting pronouncements

International financial reporting standards

In January of 2006, the CICA adopted a strategic plan to converge Canadian generally accepted accounting principles with International Financial Reporting Standards (“IFRS”) over a five year transition period ending in 2010. While the Company is assessing the impact of the transition to IFRS on its financial statements, the financial reporting impact of the transition to IFRS cannot be reasonably estimated.

4. Financial instruments and risks

The fair values of financial instruments are estimated at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial instruments of the Company include cash and cash equivalents, short term and restricted short term investments, trade and interest receivables, due from related parties, refundable deposits, accounts payable, obligations under capital lease, and liabilities of discontinued operations.

Credit risk

Financial instruments that potentially subject the Company to concentration of credit risks include cash and short term investments. The Company places its cash and short term investments with high credit quality financial institutions. Short term investments are generally held in fixed rate securities. Concentration of credit risks with respect to receivables is limited.

Foreign currency risk

The Company uses financial instruments to manage fluctuations in foreign currency exchange rates. In accordance with CICA Section 3855 the Company accounts for all derivative financial instruments using the fair value accounting method.

The Company is exposed to fluctuations in the exchange rates between the Canadian dollar and other currencies including Singapore dollars, United States dollars, Euros, Malaysian Ringgits and Swiss Francs. Most of the transactions in the Company's Singapore operations are undertaken in Singapore dollars. The Company monitors fluctuations in rates and takes action, if deemed necessary, to mitigate its risks.

At January 31, 2010 the Company had cash balances of \$22,084 United States dollars (\$23,518 Canadian dollars), \$(5,509) Singapore dollars (\$(4,156) Canadian dollars), 4,486 Swiss Francs (\$4,514 Canadian dollars) and 1,551 Malaysian Ringgits (\$484 Canadian dollars), and accounts payable balances of \$519,490 United States dollars (\$496,843 Canadian dollars), \$251,893 Singapore dollars (\$190,028 Canadian dollars), 7,942 Euros (\$7,991 Canadian dollars) and 59,411 Malaysian Ringgits (18,382 Canadian dollars), such amounts representing exposure to foreign exchange risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Short-term investments with fixed interest rates include guaranteed investment certificates with original maturities of greater than three months, exposing the Company to interest rate risk. The Company does not use financial instruments to mitigate this interest rate risk.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company currently settles its financial obligations from cash and cash equivalents. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. As at January 31, 2010, the Company had insufficient cash and cash equivalents to satisfy its short term obligations.

5. Share capital

(a) Authorized

The authorized share capital of the Company is an unlimited number of common voting shares with no par value.

(b) Issued and outstanding common shares:

	Number of Shares	Amount \$
Balance, July 31, 2008	45,455,838	28,985,958
Private placement (i)	1,003,333	424,815
Balance July 31, 2009	46,459,171	\$ 29,410,773
Private placement (iv)	5,925,000	2,458,270
Balance January 31, 2010	52,384,171	\$ 31,869,043

- (i) On January 13, 2009 the Company completed a private placement of 1,003,333 units issued at \$0.60 per unit, resulting in gross proceeds of \$602,000. Each unit consists of one common share and one common share purchase warrant. Each warrant entitles the holder to purchase one additional common share for a period of eighteen months at a price of \$0.70 per share. The warrant's exercise period will automatically accelerate if the common shares of the Company trade above \$1.00 for a period of 10 consecutive days. The Company paid a finder's fee equal to 7% of the gross proceeds of the sale of the shares (\$42,140) and issued to the agent non-transferable warrants to purchase common shares equal in number to 6% of the units sold (60,200) under the private placement with the same terms. The estimated fair value of agents' warrants granted was determined to be \$9,194 (approximately \$0.15 per warrant), using the Black-Scholes option pricing model (note 5(d)).

The amounts assigned to the share and warrant portions of the units have been allocated proportionately based on the share price at the issuance date and the warrant value determined using the Black Scholes option pricing model with the assumptions detailed in Note 5(d).

- (ii) On February 26, 2009, the Company amended the terms of the 781,500 warrants issued to subscribers of the private placement described in Note 5(b)(i). The exercise price of the warrants was reduced from \$2.00 to \$0.75 per common share. The expiry date for the warrants was extended by twelve months from March 6, 2009 to March 6, 2010. The exercise period of the amended warrants is to be accelerated if certain conditions are met. The estimated fair value of the warrants increased by \$56,753 as a result of the modification of warrant terms, determined using the Black-Scholes option pricing model (note 5(d)). The amount was considered a financing expense and charged to operations for the 2009 year.
- (iii) On August 5, 2009, the Company amended the terms of the 1,078,150 warrants issued to subscribers of a private placement which closed on December 20, 2007. The exercise price of the warrants was reduced from \$2.10 to \$0.75 per common share with no change to the expiry date of December 20, 2009. The exercise period of the amended warrants is to be accelerated if certain conditions are met. The estimated fair value of the warrants increased by \$135,460 as a result of the modification of warrant terms, determined using the Black-Scholes option pricing model (note 5(d)). The amount was considered a financing expense and charged to operations for the first quarter of the 2010 fiscal year.

5. Share capital (continued)

(b) Issued and outstanding common shares (continued)

- (iv) On October 23, 2009, the Company completed a non-brokered private placement of 5,925,000 units issued at \$0.63 per unit, resulting in gross proceeds of \$3,732,750. Each unit consists of one common share and one common share purchase warrant. Each warrant entitles the holder to purchase one additional common share for a period of twenty four months at a price of \$1.00 per common share. The exercise period of the warrants will be accelerated if certain conditions are met. The Company paid a finder's fee equal to 7% of the gross proceeds (\$261,293) and issued to the agent non-transferable warrants to purchase common shares equal in number to 6% of the units sold (355,500) under the private placement with the same terms. Legal and other costs amounted to \$34,570. The estimated fair value of agents' warrants granted was determined to be \$94,581 (approximately \$0.27 per warrant), using the Black-Scholes option pricing model (note 5(d)).

The amounts assigned to the share and warrant portions of the units have been allocated proportionately based on the share price at the issuance date and the warrant value determined using the Black-Scholes option pricing model with the assumptions detailed in Note 5(d).

(c) Common share purchase warrants

	Number of warrants	Weighted average exercise price

60,200	\$ 0.70	July 13, 2010
355,500	\$ 1.00	October 23, 2011

The fair value of agents' and common share purchase warrants has been estimated at the date of grant using the Black-Scholes option pricing model using the following weighted average assumptions:

	2010
Annualized stock volatility	83.3%
Risk-free interest rate	1.4%
Expected option/warrant life	1.2 years
Dividend payments	0.0%

(e) Stock options

On December 28, 2007, the Board of Directors approved a new stock option plan. Under the plan, the Company may grant options to purchase common shares in the Company to employees, directors, officers, and consultants of the Company. The exercise price of the options is to be determined by the Board of Directors but generally will be equal to or greater than the market price of the shares at the grant date. Options will vest according to the following schedule:

- 25% - on grant date
- 25% - six months after grant date
- 25% - twelve months after grant date
- 25% - eighteen months after grant date

As of January 31, 2010 the Company has reserved 8,340,000 common shares for issuance of stock options to employees, directors, officers and consultants of the Company of which 1,011,000 were available for future issuance.

Options expired	(1,025,000)	(0.67)
Balance, January 31, 2010	7,329,000	\$ 1.03

At January 31, 2010 5,266,500 options had vested, which have a weighted average exercise price of \$1.17.

The estimated fair value of options granted to employees, directors, officers and consultants is amortized to expense over the vesting period of the options, resulting in compensation expense and addition to contributed surplus of \$255,611 for the second quarter ended January 31, 2010 (2009 – \$33,324).

The weighted average fair value of stock options granted during the quarter ended January 31, 2010 has been estimated at the date of grant using the Black-Scholes option pricing model as \$0.46 per share using the following weighted average assumptions:

	2009
Annualized stock volatility	79.0%
Risk-free interest rate	2.3%
Expected option life	5 years
Dividend payments	0.0%

Options outstanding at January 31, 2010 are summarized as follows:

(e) Stock options (continued)

The Black-Scholes model, used by the Company to calculate option values, was developed to estimate fair value of freely tradable, fully transferable options without vesting restrictions, which significantly differs from the Company's stock option awards. This model also requires highly subjective assumptions, including future stock price, volatility, and expected time until exercise, which greatly affect the calculated values.

(f) Escrow shares

As at January 31, 2010 a total of 480,000 (2009: 2,722,500) of the issued shares were held in escrow, the release of which is subject to a pre-determined schedule through January of 2011 as indicated below.

June 2010	240,000
January 2011	<u>240,000</u>
	<u>480,000</u>

The escrowed shares are included in the computation of the weighted-average number of common shares outstanding.

6. Capital disclosures

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The Company includes shareholders' equity and long-term debt in the definition of capital. At January 31, 2010, the Company had a negative capital balance of \$69,270.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or undertake other activities as deemed appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements and the Company's overall strategy with respect to capital risk management remains unchanged from the year ended July 31, 2009.
